

# Mosammad Kabir

Brooklyn, NY | [sxdihak@gmail.com](mailto:sxdihak@gmail.com) | (631) 568-2064 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## Education

### CUNY Brooklyn College

*Bachelor of Science in Computer Science*

Expected Spring 2027

*Brooklyn, NY*

- **Relevant Coursework:** Data Structures and Algorithms | Object-Oriented Programming in Java and Python | Discrete Structure | Calculus I | Calculus II | Computer Architecture
- **Clubs & Organizations:** Computer Science Club, Rewriting The Code, CodePath Alumni & Mentor.
- **Certifications:** Mobile App Design (CodePath) | AWS (In-Progress)

## Technical Skills

**Languages:** JavaScript, HTML/CSS, Python, Java (OOD), Swift.

**Frontend & Web:** React.js, Tailwind CSS, GSAP, Three.js, Responsive Design.

**Tools & Systems:** Git, Xcode, Excel (PivotTables, VLOOKUP), Python-based data cleaning.

**Competencies:** Agile Methodology, Sprint Planning, Collaborative Development, Technical Research.

## Relevant Experiences

### Software Engineer Intern, Cognizant – Teaneck, New Jersey

Jan 2024 – Feb 2024

- Developed a full-stack portal Site for TriZetto Facets and QNXT, enterprise platforms supporting health plan operations, claims, and enrollment.
- Engineered custom UI designs and backend logic using Flask/Python with MySQL database integration.
- Collaborated in a cross-functional team during an intensive 4-week sprint to deliver a production-ready solution.
- Applied systematic testing methodologies and version control (Git) to maintain high code quality.

### AI and Automation Extern, Wayfair – Remote

Nov 2025 – Jan 2026

- Developed **AI agents** and automated dashboards to analyze design trends, monitor competitors, and generate content insights for Wayfair's vendor management team.
- Built AI-powered workflows using n8n and Gemini to automate trend discovery and insight generation.
- Expanded technical skills in AI agent development, prompt engineering, data scraping, and dashboard design.

### AI and Automation Extern, Outamation – Remote

May 2025 – Aug 2025

- Engineered a custom RAG pipeline using LlamaIndex, PyMuPDF, and Mistral 7B to automate document processing workflows.
- Implemented a hybrid retrieval system combining Vector and BM25 search with a cross-encoder reranking engine to optimize search accuracy.
- Built automated workflows with Python that reduced data processing time by 60% for production systems.

## Projects

### Mac-OS Inspired Portfolio [\[Project Link\]](#)

2026

- Designing and developing a highly interactive, desktop-themed web experience emphasizing intuitive navigation and UI components.
- Implementing custom CSS animations to mimic OS-level transitions, demonstrating close attention to visual detail.

### Responsive Website [\[Project Link\]](#)

2026

- Built a high-performance landing page featuring 3D elements and smooth scroll animations.
- Ensured cross-browser compatibility and mobile responsiveness across all device breakpoints.

### AI Chatbot [\[Project Link\]](#)

2026

- Developed a conversational interface using Streamlit, focusing on intuitive user-flow and real-time response interactions.
