

Mosammad Kabir

Brooklyn, NY | sxdihak@gmail.com | (631) 568-2064 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Education

CUNY Brooklyn College

Expected Spring 2027

Bachelor of Science in Computer Science

Brooklyn, NY

- **Relevant Coursework:** Data Structures and Algorithms | Object-Oriented Programming in Java and Python | Discrete Structure | Calculus I | Calculus II | Computer Architecture
- **Certifications:** Mobile App Design (CodePath) | AWS (In-Progress)
- **Clubs & Organizations:** Computer Science Club | Rewriting The Code | CodePath Alumni & Mentor

Technical Skills

Languages: HTML | CSS | JavaScript | Swift | Python | Java

Frameworks & Systems: React | Flask | Streamlit | MySQL

AI & Machine Learning: RAG Systems | LlamaIndex | Mistral 7B | LLMs | Hugging Face Transformers

Tools: Git | Xcode | Figma | GSAP | Three.js

Relevant Experiences

AI and Automation Extern, Wayfair – Remote

Nov 2025 – Jan 2026

- Developing **AI agents** and automated dashboards to analyze design trends, monitor competitors, and generate content insights for Wayfair’s vendor management team.
- Building AI-powered workflows using **n8n** and **Gemini** to automate trend discovery and insight generation.
- Expanding technical skills in AI agent development, prompt engineering, data scraping, and dashboard design.

AI and Automation Extern, Outamation – Remote

May 2025 – Aug 2025

- Engineered a custom **RAG pipeline** using **LlamaIndex**, **PyMuPDF**, and **Mistral 7B** to automate document processing workflows.
- Implemented a **hybrid retrieval system** combining **Vector** and **BM25** search with a cross-encoder **reranking** engine to optimize search accuracy.
- Built automated workflows with **Python** that reduced data processing time by 60% for production systems.

Software Engineer Intern, Cognizant – Teaneck, New Jersey

Jan 2024 – Feb 2024

- Participated in Break Through Tech’s 4-week Sprinternship program
- Developed **full-stack application**, including custom UI design, backend logic, and **MySQL database integration** with **Flask/Python**.
- Applied software engineering practices, including **version control with Git** and systematic testing methodologies.
- **Collaborated** in an agile team of 5 engineers to deliver a production-ready solution within a 4-week sprint timeline.

Projects

IT Helpdesk Analytics Project [[Project Link](#)]

2026

(Excel, Python)

- Leveraged Python to programmatically clean and standardize a high-volume helpdesk dataset, resolving formatting errors. Built an interactive Excel Dashboard using PivotTables and PivotCharts to analyze average resolution times across different office platforms and ticket priorities, aiding in resource allocation and MIS strategy.

AI Chatbot [[Project Link](#)]

2025

(Python, Streamlit, LLMs)

- Developed a conversational AI chatbot using Streamlit to apply and expand on concepts learned during my AI and Automation Externship.
- Integrated a large language model to create an interactive and intuitive user experience.

Document Processing RAG Pipeline [[Project Link](#)]

2025

(Python, Streamlit, LLMs)

- Built an AI-powered document retrieval system with a focus on performance optimization and memory efficiency.
- Implemented algorithms prioritizing speed and resource management for large-scale data processing.
